

A post-doctoral position is available in the Oyoshi laboratory at the Boston Children's Hospital to study the immune mechanisms of allergic diseases.

We are currently looking for a recent PhD and/or MD graduate in the field of Allergy/Immunology. Candidates who have excellent writing and communication skills in English and familiar with techniques including animal handling, multi color flow cytometry, cell isolation, tissue culture, ELISA, RT-PCR, immunohistochemistry, and preferably able to perform animal models of allergic skin/intestinal inflammation are desirable. The priority will be given to applicants with an excellent background in Immunology with first author publication(s) in international journals in Immunology area. The fellow will acquire a variety of skills that are required for in vitro and in vivo analysis of mouse models of allergic diseases, which will be instrumental for the development of his/her career.

Please send a brief statement of your research experience and career goals (limit to one page), curriculum vitae, bibliography, and names and contact information of three references in a single PDF file to Dr. Michiko Oyoshi at Michiko.oyoshi@childrens.harvard.edu. Incomplete applications will not be reviewed.

Michiko Oyoshi, Ph.D., M.Sc.
Boston Children's Hospital, Division of Immunology
Assistant Professor of Pediatrics, Harvard Medical School
