

## **Postdoctoral Research Positions in Mucosal Immunology**

The University of Massachusetts Medical School and the Department of Pathology invite applications for 2 postdoctoral positions in the lab of Andrea Reboldi, PhD.

The lab studies the metabolic, molecular and cellular requirements for mounting and controlling B cell response at the mucosal interfaces (Science. 2016 May 13;352(6287); Science. 2014 Aug 8;345(6197), Immunol Rev. 2016 May;271(1))

The successful candidates are Ph.D graduates with a strong expertise in cellular and molecular immunology, flow cytometry and in vivo models.

Highly motivated graduates from different backgrounds with an interest in the field of mucosal biology and/or host-microbiome interactions are welcome to apply. Any experience in bioinformatics approaches to study the microbiome is beneficial, but not essential for these positions.

Applications will be accepted until the positions are filled. Applicants should submit curriculum vitae, list of publications and contact information of two references to:

Andrea.Reboldi@umassmed.edu

UMass Medical School is committed to being an equal opportunity and affirmative action employer and recognizes the power of a diverse community. We encourage applications from protected veterans, individuals with disabilities and those with varied experiences, perspectives and backgrounds to consider UMass Medical School as their employer of choice.
